“FUTURE PLANS OF DSCL (“COMPANY”)**Davangere Sugar Company Limited: Driving Growth with Expansion, Farmer Initiatives, and New Revenue Streams**

Davangere Sugar Company Limited (NSE: DAVANGERE, BSE: 543267), a fully integrated sugar, ethanol, and renewable power producer based in Karnataka, proudly carries a legacy of over five decades since its incorporation in 1974. Over the years, the company has scaled its sugarcane crushing capacity from 1,250 TCD to **4,750 TCD**, while also commissioning a **24 MW co-generation power plant** and a **65 KLPD ethanol distillery**.

Strategic Growth in Ethanol and Feedstock

With ethanol demand rising sharply under India’s blending program, DSCL has already advanced plans to enhance its ethanol capacity from **65 KLPD to 85 KLPD within FY25**, with a further roadmap to reach 110 KLPD and 35 MT CO₂ Plant in the future. To ensure year-round operations, the company is set to procure significant quantities of **broken rice and maize**, not only to secure raw material for ethanol production but also to establish **trading activities in grains** where surplus procurement is possible—unlocking a new revenue stream for the business.

Expanding Cane Cultivation and Farmer Support

This year, DSCL is targeting an increase of **15,000 acres of sugarcane cultivation**, backed by comprehensive farmer-centric initiatives. These include:

- **Mechanical harvesting systems** to reduce costs and increase farmer profitability.
- **Organised transport solutions** to improve logistics and cane supply to factory gates.
- **Transport subsidies and incentives** to ensure higher farmer earnings and consistent cane supply.

With these initiatives, the company aims to surpass **5 lakh MT of sugarcane crushing in the coming years**, which will have a multiplier effect across sugar output, ethanol revenues, renewable power generation, and by-products.

Outlook for Shareholders

Speaking on the company’s vision, Mr. **Ganesh Shivashankarappa Shamanur**, Chairman & Managing Director, said:

“Davangere Sugar is at a turning point in its growth journey. With expansions in ethanol, aggressive grain procurement, increased cane cultivation, and farmer-friendly initiatives, we are creating a robust growth model that strengthens revenues, profitability, and long-term shareholder value. Our integrated operations ensure that every part of the sugarcane and grain feedstock contributes to sustainable growth and rural prosperity.”

About Davangere Sugar Company Limited

Founded in 1974, DSCL has grown into a diversified and fully integrated sugar, ethanol, and renewable power company with strong farmer partnerships and a zero-waste philosophy. Its portfolio spans **white crystal sugar, high-grade ethanol, renewable power, organic fertilisers, and by-products**, positioning the company to capture opportunities in India’s fast-growing biofuel and renewable energy sector.
